Advent wreath Pina

Instructions No. 3112

Difficulty: Beginner

Working time: 1 hour

This Advent wreath is a beautiful classic Christmas decoration that you can quickly create yourself. The natural look is combined with the elegant gold , and the arrangement looks great in almost any home.

First of all: Things to know about decorating wax

Before you start with the Processing of material: decorating wax, you should put it in the fridge. It can be cut and punched very easily when chilled. decorating wax already adheres to a candle by hand heat and does not require any further glue to fix it.

How to make the Advent wreath

The off-white candles are decorated with 1 to 4 golden wax strips to match the weeks of Advent. You therefore need 10 decorative wax strips, each 6 cm long and 1 cm wide. Press the appropriate number of strips onto one of

the candles for each week of Advent.

Stick the kandelaar into the VBS Fir wreath and place the candles on top. Now start decorating with golden baubles and red berries.

Cut the wire from some christmas balls and stick them into the wreath. Cut a few berries from the berry branch and stick them into the wreath with hot glue.

Must Have

VBS Fir wreath "Pina"

Diameter (outside): 30 cm
Material: Plastic

23,40 CHF
