

Anleitung: Thermometer aus Terrakotta mit Serviettentechnik dekorieren

Instructions No. 1105

This funny thermometer is a cute decoration idea for inside and outside. To create the thermometer we use among others the Napkin technique . Follow our instructions and create a decorative thermometer for your garden or house.

How do I proceed to decorate the Terracotta-thermometer?

Prime the Terracotta-thermometer and a piece of aluminium sheet with white Acrylic paint. Cut out the snail motif from the Napkin and glue it onto the primed aluminium sheet with Napkin varnish . Punch out and cut out the shape with a pressing tool.

Cut out the clouds from the napkin motif and glue them onto the white primed Terracotta. Take a hot glue gun and glue the scroll onto the thermometer. Then paint the grass with some green and light green. Use a stippling brush for this. Paint the edge of the thermometer with green and light green.

- **Extra tip:** If you want to hang the thermometer outside, use Outdoor-Acrylic paint,. If you want to use it inside, normal Acrylic paint is sufficient.
