

Birdhouse with fire painting

Instructions No. 2125
🔪🔪🔪🔪 Difficulty: Beginner
🕒 Working time: 2 Hours

What would spring be without the **birds**. To make the birds feel even more comfortable on your terrace, balcony or garden, we have a great idea for an aviary with cute motifs, drawn with **branding paint**.

This is how the great bird house is designed:

First paint the **bird house** in the desired wood glaze colours. Let it dry for about 1 hour.

Print out the templates and transfer them onto the wood using graphite paper.

Connect the Brandmal-Pen to the power supply and wait about 5 minutes until it has heated up completely. Now you can slowly draw the lines on the wood with the Brandmalpen. You can also use different tips on the motifs to create thicker and finer lines. To change the tips, either carefully unscrew them with pliers or let the pen cool down completely before you can easily change the tips. If you have no experience with the Branding Pen, you can practice on a piece of wood to test the different attachments.

Afterwards you colour the birds also with the wood glaze. It is advisable to use a small brush to paint the small areas of the birds.

To protect the bird house from environmental influences, it can be sprayed with edding **clear lacquer**.
