Bottles with Décopatch

Instructions No. 2276

Difficulty: Beginner

Working time: 2 Hours

This is how **glass bottles** become eye-catchers - with the simple **Décopatch technique**! With just a few papers and glue, you can transform the simple bottles into colourful vases, storage bottles or impressive works of art.

This is how the bottles are designed:

Tear your desired **Décopatch paper** into small pieces or cut it into pieces or strips with scissors. Apply **Paperpatch glue** to the desired area. Place the small pieces of paper on the glass bottles with a brush and paint over with another layer of glue.

Continue in this way. You can combine the papers with other papers. You should position the papers slightly on top of each other where it should be uniformly covered with papers.

For an even surface and for protection, you can apply one or two coats of **varnish**, as desired.
