Bouquet of dried flowers

Instructions No. 2261

Difficulty: Beginner

Working time: 1 hour

Give a bouquet of dried flowers as a gift. The dried flower bouquet looks great and will give you pleasure for a long time, as the bouquet does not wither.

It's quick + easy:

Choose your flowers and grasses from the large assortment of **dried flowers**. In our decoration example, we have used pampas grass, lavender, strip grass and eucalyptus. Take a look at our **Dried Flowers & Fruits category** and discover many more.

Tip: Spray the dried flowers with **hairspray** beforehand. This way, the flowers will keep for a long time, retain their brightness and lose fewer leaves or seeds.

Shorten the **stems** if necessary and make a bouquet from the selected flowers. This can be tied together at the bottom with some **jute ribbon**.

The tied wreath can now be wrapped in **tissue paper** and decorated with a bow made of **wide jute ribbon**.

You can personalise a small envelope and cards with stickers and markers from the **"Give a Gift" kraft paper set** and write loving messages on them.

Tie a small bouquet and stick it on the envelope.
