Christmas metal star with candle

Instructions No. 2671

Difficulty: Beginner

Working time: 2 Hours

Are you looking for a beautiful DIY Christmas decoration that is quick and easy to make? Then this metal star with candle is just the thing. With just a few different materials, the simple star becomes an impressive decoration for the Christmas season.

First wrap the light chain completely around the metal star. Fix the battery compartment with a little hot glue under the candle plate. Make sure that the compartment can still be opened to replace the battery.

Now you can decorate the star as you like with different decorative pieces. In our example, we chose eucalyptus,

star scatter pieces in different sizes, golden Christmas balls and ribbons in different colours. Attach everything with hot glue or double-sided tape.
