Christmas tree trunk figures

Instructions No. 1831

Difficulty: Beginner

Working time: 45 Minutes

Whether on the windowsill, a chest of drawers or outside in the covered entrance area - these cute fellows will put a little smile on any face. The handicrafts are particularly suitable for an afternoon of handicrafts together with children.

Here's how it's done:

First download the free **motif template**, print it out and transfer the cut-out motifs to the respective foam rubber plates**.** For Santa Claus, stick on the beard and the cap over the face, for the snowman the black cylinder on the head. It is best to use something **Handicraft glue**

Now glue the already cut out faces with **hot glue on** the bark trunks**.** With **Wobbly eyes** you can make funny faces to the snowman, Santa Claus and the reindeer. As noses you can use little **Pompoms** or with the snowman a small **styrofoam carrot.** The mouth of the snowman was also made of small Pompoms ones

Finally, with organza ribbons and knitted Jingles tubes the three journeymen finished decorate.
