Classic Advent wreath

Instructions No. 2873

Difficulty: Beginner

Working time: 2 Hours

What would Christmas be without an Advent **wreath?** In our tutorial we show you how you can easily make a wreath in the **classic colours red and green**. This way, every time you light the next candle for Advent, the time is shortened and made more beautiful.

This is how you create the wreath:

Cut off individual branches of the **VBS thuja garland** and stick them between the **fir wreath** using **hot glue**. Then insert the **candle plugs** into the wreath. Place the candles of your choice on top. You can then decorate the wreath as you wish. We have **natural decorations**, **scatter decoration** and **christmas balls** glued them to the wreath with hot glue.

You can decorate the finished wreath on a plate in a bowl or on its own on a table.
