

Cosmetic tissue box in concrete look

Instructions No. 3077

Difficulty: Beginner 

This stylish box with graphic elements in a concrete look has a simple design. The semi-circles are bang on trend and create an exciting 3D effect. Embellish your cosmetics or tissue boxes now too!

Make a stencil out of paper. For these instructions, a circle with a diameter of 5 cm was used and then divided in the centre. Trace the outline of the semi-circle onto the foam rubber with a pencil and cut out all the semi-circles as precisely as possible using scissors.

Cover one side of the semicircles with double-sided adhesive tape. Remove the protective layer from the adhesive tape and place your shapes on the tissue box. Tip: Use a ruler and pencil to draw fine guide lines on the undecorated products. This will ensure that you stick all the foam rubber parts on straight.

Now the edding permanent spray in concrete look comes into play. Before using it for the first time, remove the red safety ring and shake the spray for 3 minutes. You can then spray it evenly onto your foam rubber-covered element. Spray evenly in a criss-cross pattern and at a distance of approx. 25 cm from the object and allow the tissue box to dry sufficiently. Then fill the tissue box with tissues and enjoy your new decorative element in a trendy concrete look.

Must Have

[edding 5200 "Permanent spray", concrete effect](#)

● **16,90 CHF** (1 l = 84,50 CHF)
