

Décopatch box "Star"

Instructions No. 2126

Difficulty: Advanced 🍴🍴🍴🍴

Working time: 50 Minutes

Wrap your personal gift in an environmentally friendly star-shaped box. Noble and with Décopatch paper self-designed, this is not only practical but can later be used as Christmas decoration!

Noble handicraft fun with Décopatch paper

First cut the [Décopatch papers](#) to the individual surfaces of the box. Prime the box lid with white craft color.

As soon as the primer is dry, coat the top of the lid with [Paperpatch glue](#). Now you can gradually cover the individual areas of the star lid with the paper. This works best with a brush. Protruding paper can be corrected with a scalpel. Also glue the side walls of the lid.

Coat the outside walls of the box bottom and the underside of the lid with a fine golden paint. Finally, arrange a ribbon together with some fir green and small bells on the lid and fix the decoration with glue. Afterwards, apply craft glue to the entire surface. This serves as a protective layer and ensures a smooth surface.

Extra tip: If the paper contours are not perfect, you can refine the look by painting over these contours with a white or golden liner.
