Deko-Flaschen mit Draht-Ornamenten

Instructions No. 548

The red wire ornaments on these bottles are particularly impressive because of the grey fabric on which they are placed. The result is a pretty decoration, which works through the unusual combination of fabric, wire and beads.

Here's how it works:

Measure the circumference of the bottles and cut the Cotton fabric to size with the pinking shears. Mark the sides of the bottles with a line-ex pen on the fabric so that the elements can be placed in the middle of it.

Now bend the hearts and ornaments out of the 2 mm thick decorative aluminium wire with the round nose pliers and attach individual cut glass beads with the 1 mm decorative aluminium wire. Fix the elements with enamelled copper wire on the fabric and stick it around the bottles with tape-Ribbon .

Finally, decorate the bottles with ribbons and glass beads.
