# Design necklaces with casting resin

**Instructions No. 3254**

Difficulty: Beginner

Working time: 1 hour

Do you want to create your own **stylish necklace** that is guaranteed to turn heads? Then these instructions are just the thing for you! With **UV resin** and a little creativity, you can design **beautiful necklace pendants** decorated with **sparkling glitter** and delicate **dried flowers**. In these detailed instructions, you will learn step by step how you can easily create your individual piece of jewelry at home.

## Create unique necklaces from UV resin with flowers and glitter

**Designing the base**

**Step 1:** First prepare your workspace. Make sure you have all the materials to hand. Start by pouring a thin layer of resin - about 1-2 mm thick - into your chosen mold. You can try out different shapes to find your own style.

**Step 2:** Place the mold under your UV lamp and let the resin cure for about a minute. The short curing time is an advantage when working with UV resin, as you can quickly move on to the next steps.

**Unleash your creativity**

**Step 3:** Now is the time to let your creativity run wild. Add decorative elements such as dried flowers, glitter or even gold flakes to give your design a special touch.

**Step 4:** Cover these decorations with another layer of resin. Make sure that all elements are well embedded in the resin so that they stay securely in place.

**Step 5:** Cure the new layer under the UV lamp for about one minute. To avoid overheating, take a short break between each curing process.

**Finishing the piece of jewelry**

**Step 6:** Once the resin has fully cured, carefully remove your creation from the mold. If the resin is still sticky, give it a few extra minutes under the UV lamp until it is fully cured.

**Step 7:** Finish your necklace by adding a matching jewelry cord or an elegant anchor chain. Choose something that harmonizes well with your pendant and matches your style.

**Your unique piece awaits you!**

In just a few steps, you have now created a unique necklace that is both fashionable and personal. Check out our online store to order all the materials you need and start your next craft project. Let your imagination run wild - the possibilities are endless!

## Must Have

UV Casting resin "Cléopâtre Resin UV'Glass", 25 g

Weight: 25 g

**22,40 CHF** (1 kg = 896,00 CHF)
