

Eine Eule steht Spalier!

Instructions No. 919

This owl has got its regular place and is an eye-catcher in the garden. You can also easily make this decoration. With some woods and fir branches, this original idea will soon find a place in your garden.

And it is as simple as this:

To construct a fence, place two fence slats each with Lace facing outwards, with a slight gap between them and the top row. Take one batten and staple it vertically, with the tip pointing upwards over the four battens. Staple another 5 battens to the fence frame, keeping one batten in place as a spacing. On the lower crossbar you now tack another five battens with the Lace downwards, so that you can set up the fence later in the ground. Now you can put the owl on a fence batten and decorate the finished fence with Fir .
