Fabric flowers with a face in a pot

Instructions No. 3003

Difficulty: Beginner

Working time: 3 Hours

You can quickly and easily make these little friendly fabric flowers yourself. The face of the flowers is already pre-printed on tricot fabric and sewing the petals is also easy. Have fun making them!

Design flower faces

First prepare a sewing needle by threading a long, tear-resistant sewing thread. Cut out the flower faces from tricot fabric and sew along the edge of the fabric using a basting stitch.

Use the template to cut a circle out of cardboard for each flower. Place some wadding behind the face and then place the cut-out circle on the wadding. Now close the basting seam on the back of the fabric and knot the ends.

blossom petals manufacture

transfer the circle template onto the fabric for the flowers. You will need 6 circles for each flower. Cut them out, fold them once in the middle and press them flat briefly.

Take a particularly long, tear-resistant sewing needle and sew the petal with the basting stitch just along the open edge, as you did with the face. Do not cut the thread, but use the same thread to stitch the remaining petals to the edges. Then use the thread to carefully pull the individual flowers together (crimp) so that only a small hole remains in the middle. Glue a finished face onto each fabric flower with hot glue, simply place a round stick behind each one.

Paint a terracotta pot with handicraft paint, fill it with flower arrangement foam and cover it with some moss (also fix it lightly). Tie a bow around the flower pot and finally insert the fabric flowers into the flower pot flower arrangement foam.
