Fir trees made from embossed sheet copper

Instructions No. 430

The small fir trees in country house style look particularly noble due to the warm copper tone. The nostalgic look can be achieved simply by plastic stamping and stamping.

Here's **how it works**

First prime the round bar and Wooden discs copper colored. Then use the template to make a Stencil and cut out four fir trees from the aluminium sheet. Dab antique white Handicraft paint.

After drying, stamp curlicues and bells on the white side of the fir trees and curlicues on the bare back. Tighten these firmly with the metal pressing tool and then sand the lines on the front until the copper sheet becomes visible again. The entire fir tree is then shaped three-dimensionally with the back of the spoon.

Glue two fir trees to each other with hot glue, fix a piece of round stick and glue it into the wooden disc. Finally, decorate the fir trees with gemstones.

Are you looking for another idea for the handicraft technique metal spinning?

Instruction no. 429 Ice skates made of embossed sheet copper shows you how many different unusual things can be made from sheet metal.
