

# Fun throwing game for the summer

Instructions No. 620

Difficulty: Beginner 🍷🍷🍷🍷

Working time: 45 Minutes

themenset\_358\_anzeigeblock\_2\_textblock

Here's one for the eye. Behind the colorful **Stretched Canvas** hides a fun **throwing game** that is great fun for the big ones and the little ones. The pirates are painted with the help of a template and off you go.

## Here's how it works:

First you have to **enlarge** the template **with several single copies to 200 % and then** you have to **Adhesive tape** together. Now **hatch the back with** a pencil **and** place it on the **Stretched Canvas**. If you trace the **contours** with a **ballpoint pen** , they are pressed through to the substrate. Alternatively, you can transfer the templates directly to Stretched Canvas using the **raster method**.

Next, the eye patches are cut out **with** a scalpel. Now you can cut out the motifs with **Handicraft paint** colorful design. After drying, the contours are painted with a **fine brush** or **Marker** once again drawn in black.

In the last step the **Felt sheet** cut in half. The halves are glued with **hot glue behind** the holes in Stretched Canvas . Paint the **papier-mâché balls** black and after drying paint them with white and grey light spots on them.

And already the funny **throwing game** is ready **for the summer** and waiting to be used!

### Extra tip: **Raster method**

With this method you can transfer Painting templates proportionally enlarged or reduced to the desired substrate. Divide Stretched Canvas and the template with a pencil into the same number of grid fields and transfer the template field by field

Must Have

[VBS Stretched canvas 50 x 70 cm](#)

● **14,40 CHF**
