Gift packaging designed with papercut

Instructions No. 2655

Difficulty: Beginner

Working time: 3 Hours

If you are still looking for an unusual packaging for your personal gifts, then this paper cut idea in natural look is just right for you!

The packaging here is made of natural cardboard boxes and kraft paper.

First paint the cardboard boxes that you want to use as packaging for your gift with craft paint in sea green.

First, cut the kraft paper so that you can wrap it around the corresponding box as packaging. Using the carbon paper, transfer the design template to the kraft paper so that your Papercut design will be presented exactly on the box later. Turn the kraft paper over and mark the area on the back that the design will need. Then paint this with sea green paint.

Once the paint has dried, you can begin the actual paper cut crafting technique: Place the kraft paper on the cutting mat. Now use the scalpel to cut the dotted line of the eucalyptus leaves, fold each leaf over individually so that they stand out plastically. Punch small leaves into the paper with the hole punch and finally trace the stems of the eucalyptus leaves with the black marker.

With adhesive tape, you can now wrap your box in the unique wrapping paper. Simply tie another natural jute ribbon as a bow around and bend the cut leaves if necessary still something in shape.

With this naturally wrapped gift you will certainly score.

Must Have

Scalpel, approx. 15 cm

Number of parts: 5
Material: Metal

6,35 CHF
