gift wrapping made from craft wood

Instructions No. 2923

Difficulty: Beginner

Working time: 1 hour 30 Minutes

Are you still looking for a beautiful **gift wrapping**? We have just the thing for you. Create a beautiful wooden gift box for a candle and a self-cast candle holder with **craft blocks**.

How to design the gift wrapping:

For the **wooden block box**, glue the blocks together with **handicraft glue** as shown in the picture. Saw three of the wooden blocks to the right size. Place the presents in the individual compartments.

To decorate the gifts, wrap the **stick candle** and the cookies in protective sleeves. Close the ends with a thin nylon thread, to which you also tie two jingles . You can now place these in the wooden block box. Next, mix the **casting compound** according to the instructions for the candle holder. Fill the **mold** about half full. After 30 - 45 minutes, you can remove your candle holder from the mold. Leave it to air dry for another 45 minutes and then place it in the wooden block box.

Next, stick a **sticker** of your choice onto a piece of cardboard for the pendant, which you then cut close to the edge. Punch a hole in the top, e.g. with the hole punch. Now wrap the wooden block box with the **cord** and attach the pendant to it. Tie a pretty bow at the end. Now knot the ends and curl the ends of the cord.

Tip: If you want the presents to lie securely in the box, you can fix them to the underside with Patafix.
