Houses template for your Silhouette Cameo

Instructions No. 1863

Difficulty: Beginner

Working time: 2 Hours

We have created these **beautiful houses** for you **as** unique motif templates, which you can easily download as a file and **transfer** to the plotter machine. This machine cuts out filigree motifs perfectly.

Our beautiful houses are great to decorate and give away. Equipped with a light chain you can conjure up beautiful light sources in your home.

You can download the motive templates "houses" in this manual as normal download or as plotter template. Altogether we provide you with three different houses.

For the plotter version, download the DXF files and set your Silhouette Cameo to "cardboard" and "cut". Set the dotted fold lines to "cardboard" and "scoring" under the second setting option.

If you do not have a plotter machine, you can of course download the templates as a PDF file and transfer them to your desired carton. Afterwards you can cut them out with a cutter knife.

After cutting, fold the house in the places marked with the dotted lines on the templates and glue them together. Finally, simply glue the roof of the house.

Here you can find more beautiful motif templates for the Silhouette Cameo
