Lantern Carousel

Instructions No. 2332

Difficulty: Beginner

Working time: 5 Hours

I walk with my lantern.... And my lantern with me.
The lantern looks like a great shadow play in the dark. If the lantern turns a little, it almost looks like a revolving **carousel**. With this great lantern you will attract everyone's attention. You can also decorate the lantern in the children's room as a beautiful lamp after the lantern run.

Make the lantern as follows:

Start by painting the **base and lid of the lantern** with crimson craft paint. Print out the template and transfer the triangle template to the lantern base and lid. Colour them in with gold paint.

Using a pencil, divide the drawing **transparency paper** into 2 cm, 15 cm and 1.5 cm strips.

Transfer the **horse templates** to the cardboard and cut them to size. Cut the Washi Tape in the middle and stick it on the transparent paper so that it looks like carousel sticks. Decorate the horses with the star stickers.

Glue the lantern together. Paint the **lantern stick** in gold.
