Luminous garden plugs

Instructions No. 2227

Difficulty: Advanced

Working time: 2 Hours

Let your **garden and balcony** light up. With these wonderfully designed **plugs**, you are sure to attract attention. The **Alcohol Ink technique** always creates great colour gradients and effects on the baubles and you can create them with your desired colours.

You design the impressive plugs as follows:

First cover your workspace. Now spread cling film on the work surface and drip the **Alcohol Ink colours** you want to use onto it. Then place the **plastic ball** in the middle and wrap the foil around the ball so that it is completely wrapped and the paint touches as much of the ball's surface as possible.

The foil can then be shaped to create very **individual patterns**.

Leave the balls and the foil to dry overnight and then remove the foil.

The **marker** included in the set can be used to add lettering or small drawings as desired.

Use the **acrylic neon colours** to decorate the round rods and the scatter pieces.

Insert the lights of the **fairy lights** into the spheres and then insert the round rod into the socket of the sphere. The remaining cable and the battery compartment can be run along the back of the rod and attached.

Knot the satin ribbons underneath the ball and attach the scatter pieces to them with hot glue.
