

Motiv-Vorlage Tannenbäume

Instructions No. 1259

Difficulty: Beginner 

Motif template for three decorative fir trees from Felt.

And it's as simple as that:

To make the decorative fir trees, simply use the motif template

Cut out the individual templates for the cuts from Felt . Follow the solid lines. The dotted lines indicate that the Stencil is actually longer. Also the folds are shown as dashed lines.

Choose a suitable Felt sheet and transfer the Stencil with a masking pen. Then cut the Felt sheet to size. Use hot glue to fix the firs. Simply glue the individual fir tree tiers together to form the shape of Fir

You can decorate fir trees as you wish with scattered pieces, pearls or fairy lights

A creative decoration idea for Christmas with little effort, which you can also recreate very well with children.
