

# Original gift packaging

Instructions No. 1411

🔪🔪🔪🔪 Difficulty: Beginner

🕒 Working time: 15 Minutes

Prepare a special treat for friends and family and give away your "Easter eggs" in a very individually designed Easter packaging.

## How to make your Easter Gift wrapping

### Gift wrapping Bunny

Download the design template. Use this template to double-cut the bunny ears, eyes, and round feet. The small jagged circles are needed 6 times, they make the paws. Teeth and the two parts for the carrot are simply needed.

Glue all parts directly on the bag to form a bunny profile. Paint a wooden hemisphere with red paint - this will be the bunny nose.

With a black fine-liner you can now draw moustache hair. Trace the contours on the edges of the ears, eyes and feet. Thereby everything looks more plastic. With small curls the carrot gets a profile. Finally, set small accents on the feet with a white Fineliners .

### Gift box chicken

The motif template for the chicken consists of two pairs of wings and a pair of beaks. Cut out the individual parts from colorful Motif cardboard and glue the smaller part of each pair onto the larger one. Trace the edges with a black Fineliners or wipe over the paper edges with a black Ink Pads . Beak and wings are now simply glued onto the gift box.

White painted Wooden balls are used as eyes and get pupils and eyelashes through a black Fineliners .
