Paper-Marina's Light" lanterns

Instructions No. 2928

Difficulty: Beginner

Working time: 2 Hours

Get creative and create a beautiful **wind light** thanks to the **punching template "Marina's Light"**, which can be shaped into imaginative and individual lights with accessories such as ribbons, choice of papers and scatter decorations. Also an excellent gift for your loved ones.

The wind light is built like this:

Punch out the **punching template "Marina's Light"** using the **Sizzix Big Shot**. Two punched **papers** are required for one light. Glue them together with **VBS handicraft glue** together. After the glue has dried, place the strips on top of each other. Illustrated instructions can be found on the back of the packaging at punching template.

Prime the **punched motifs wings** with white handicraft paint . Then dab with Stamperia "Arctic", Snow White. This paste imitates the consistency and structure of snow with its typical whiteness and transparency. Once dry, tie around the lights with the silver cord and clip. Untwist the cord to create many "fine" threads. Place the **LED chain of light** with battery compartment under the lights.
