

Paper Wind Light "Marina's Light"

Instructions No. 2928

Difficulty: Beginner 🍴🍴🍴🍴

Working time: 2 Hours

Get creative and create a beautiful **wind light** thanks to the **punching template "Marina's Light"**, which can be shaped into imaginative and individual lights with accessories such as ribbons, choice of papers and scatter decorations. Also an excellent gift for your loved ones.

The wind light is made like this:

Punch out the **punching template "Marina's light"** using the **Sizzix Big Shot**. You will need two pieces of **paper** to make one light. Glue them together with **VBS handicraft glue**. After the glue has dried, place the strips on top of each other. You will find illustrated instructions on the back of the punching template packaging.

Prime the **angel wings** with white craft paint. Then dab with Stamperia "Arctic", Snow White. This paste imitates the consistency and structure of snow with its typical whiteness and transparency. When dry, tie

around the lights with the silver cord and jingles. Untwist the cord to create many "fine" threads. Place the **chain of LEDs** with battery compartment under the lights.
