

Plotting Advent houses

Instructions No. 2067

🔪🔪🔪 Difficulty: Beginner

🕒 Working time: 1 hour

Advent, Advent, a little light is burning. With our beautiful Advent houses you **can** light up the right little house for every Advent. For this purpose we have created these beautiful houses as unique motif templates, which you can easily download as a file and transfer to the plotter machine. This machine cuts out filigree motifs precisely.

The **motif templates** "Advent houses" in this manual can be downloaded as normal PDF download **or as plotter template**. In total we offer you four Advent houses.

This is how houses are made:

Open the templates as DXF files in Silhouette Studio. Under "Design", the templates are grouped correctly and marked in colour as they should be set under "Send"

Under "Send", select the lines marked red under "Design" (normal lines) (are grouped, i.e. click on any normal line). Under "Tool 1" select material, set to "Cut" and select automatic blade

Now again under "Send", select the lines (dashed) marked blue under "Design" (they are grouped, so click on any dashed line). Under "Tool 2" select material, set to scoring and select ratchet blade.

Click on "Send". The template will be plotted

If you do not have a silhouette, you can also download the pdf files and transfer them to the desired Craft cardboard sheet one. Now cut out everything exactly. A precision knife is best suited for this

Apply 3 mm wide double-sided Adhesive tape adhesive to the adhesive folds and glue the houses together. Finally, place a Maxi tea light candle inside.
