

Russisch inspirierte Ostereier

Instructions No. 258

Bright patterns and above all the colourful matryoshkas characterise the colourful Russian folklore, which is finding more and more friends all over the world. The striking features can also be wonderfully used in modern home decoration and in everyday life. In order to make the strong colours shine, they are often backed with a black background and the surfaces are painted glossy

Black Déco Spray provides the perfect, even base for the expressive painting of these Russian-inspired flowers. The flowers are Easter eggs. first stencilled on in white and then coloured, giving the painting an additional plastic effect.
