Sew cushions and design with plotter motif

Instructions No. 1945

Difficulty: Challenging

Working time: 2 Hours 30 Minutes

Our **colourful pillow** will put you in a good mood when you look at it! Thanks to the sewn cushion cover with hotel closure, the ticking **can** also be quickly removed to wash the cover. Our free **plotter template** allows you to cut out beautiful motifs filigree with the Silhouette **machine** and arrange and design them on the pillow.

So the cushion is sewn and the plotter motifs are applied:

Transfer the **patterns to** the **fabric and** trim them with 1 cm seam allowance.

The two blanks for the back are **first** prepared for the hotel closure. First fold in 2 cm on the two short sides and topstitch the edges with a narrow edge. This will give you a clean finish.

Sew **Piping tape** on the Fabric cut front side.

Now place the Fabric cuts backside on the Fabric cut front side, put them together and sew everything together. Turn the pillowcase over

Now open the plotter template **in** your Silhoette **Studio**. Place the iron-on film on the mat so that the back (white side) is facing upwards. Start the plotting process. Finally, iron the motifs onto the pillowcase according to the package instructions. Once you have ironed the film on, the cover is hand washable. With the transfer press, **you can** wash it at 40°C.
