stretched canvas with tree from christmas balls

Instructions No. 3135

Difficulty: Beginner

Working time: 2 Hours

Are you looking for a creative and festive craft idea for the **Christmas season**? Our tutorial shows you how to create an impressive**"tree from christmas balls**"! With these instructions, you can create a beautiful decoration that will sweeten the festive season for you and your loved ones. Let's get started right away!

Step-by-step instructions: Tree from christmas balls

Preparations:

Start by drawing a large triangle on the stretched canvas with a sublimation pen. This triangle will define the outline of your christmas balls tree. Make sure that the triangle is even in order to achieve a harmonious tree shape later on.

Arranging the baubles

Then place the Christmas tree baubles in the drawn triangle to see how many you need. This will help you to make optimum use of the space and distribute the baubles evenly.

Attaching the baubles

Now use a hot glue gun to attach the Christmas tree baubles to the previously determined spots. Press each bauble firmly for a few seconds so that the glue adheres well. Be careful not to burn yourself with the hot glue.

Add a star

Cut out a star from golden Paper . This will decorate the top of your tree. Attach the star to the top of your Christmas tree with hot glue. Make sure that the star is clearly visible and neatly cut out.

chain of light attach

Finally, place the chain of light provisionally around the baubles. Start at the top with the end of the chain of light, that does not have a battery compartment. Lay the chain of light so that the battery compartment leaves the edge of the picture either to the right or left of the top of your Christmas tree.

Fastening the battery compartment

Finally, attach the battery compartment behind the stretched canvas. with hot glue. Make sure that it is securely attached so that the chain of light works well and the battery compartment is not visible.
