# Tips for creative design with stencils

**Instructions No. 3341**

## Discover the world of stencilling: creative ideas for your projects

The **stencilling technique** is a tried-and-tested method for transferring motifs quickly and easily without the risk of freehand painting. Whether on boxes, stretched canvas or walls - it **stenciling** is versatile and easy to master. In this Article you will find useful **tips** and learn more about the creative uses of **stencils**.

## Why stenciling?

Stencils are particularly popular for wall design. You can quickly give your home an individual touch. But furniture, stretched canvas and paper crafts also benefit from this technique. Stencils not only offer only beginners confidence, but also inspire experienced creatives. Visit our VBS craft store to discover high-quality stencils made from washable and durable plastic.

# Tips on the material

**1. Tip - Choose the right color**

Use thick paints for the stenciling to avoid bleeding. Acrylic paints are ideal as they are blendable, highly opaque and lightfast.

**2. Tip - Use stencilling brushes**

Real stencilling brush es have short bristles that are cut straight. They dab filigree motifs without bringing paint under the stencil . Incidentally, stencilling brushes are also better suited for grading several colors within a motif. This is mainly because stenciling involves dabbing rather than painting (see tip 8).

**3. Tip - Don't forget the painting palette**

To avoid using too much paint, use painting palettes or cups. This way, you can simply dab off excess paint and achieve a perfect result.

**4. Tip - Self-adhesive stencils?**

When buying, make sure that your stencils are self-adhesive. These adhere to various surfaces, but are not suitable for mirror-inverted motifs.

**5. Tip - adhesive spray holds the stencil in place**

An adhesive spray ensures that the stencil does not slip. It is easy to remove or wash off and makes your work easier.

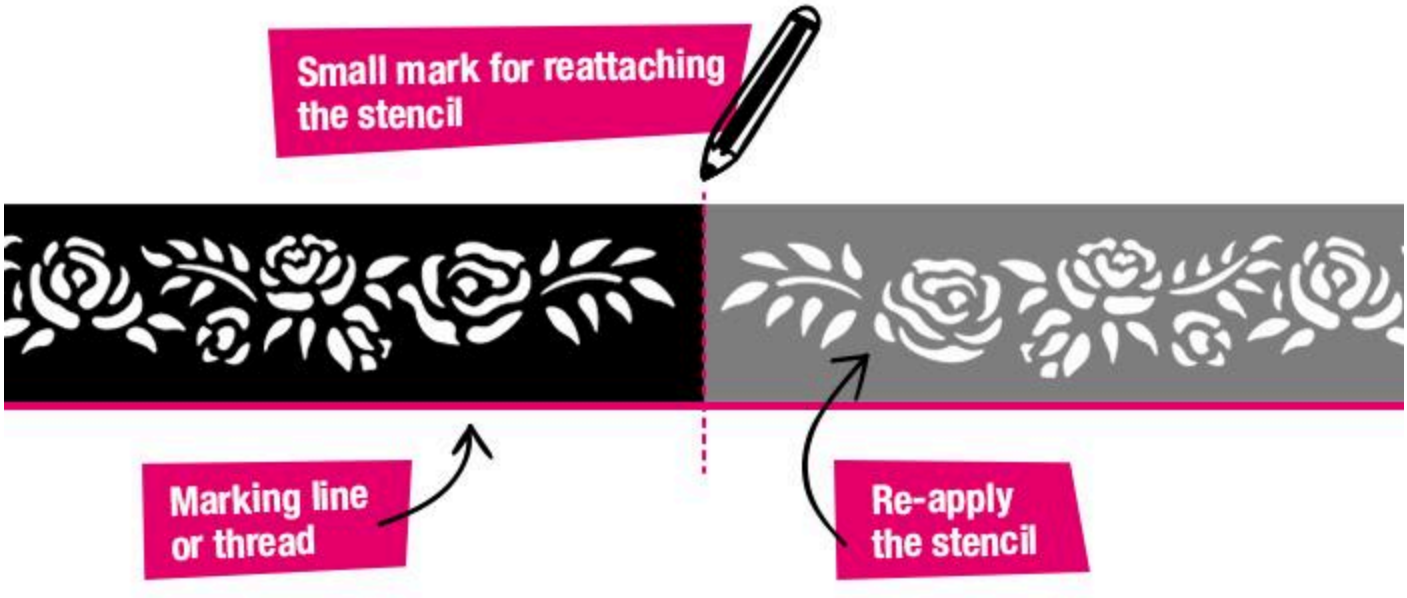

# Tips for preparation

**6. Tip - Clean surface**

Before you start, make sure that your surface is clean and free of grease or dirt to ensure the best possible result.

**7. Tip - Guide lines for borders and patterns**

Use pencil lines or taut threads to help you to apply templates for borders evenly. Mark end points for even spacing.

## Tips for Processing of material:

**8. Tip - Dabbing instead of painting**

Dab the paint on with little pressure from the inside out. Avoid stroking movements to achieve clear contours.

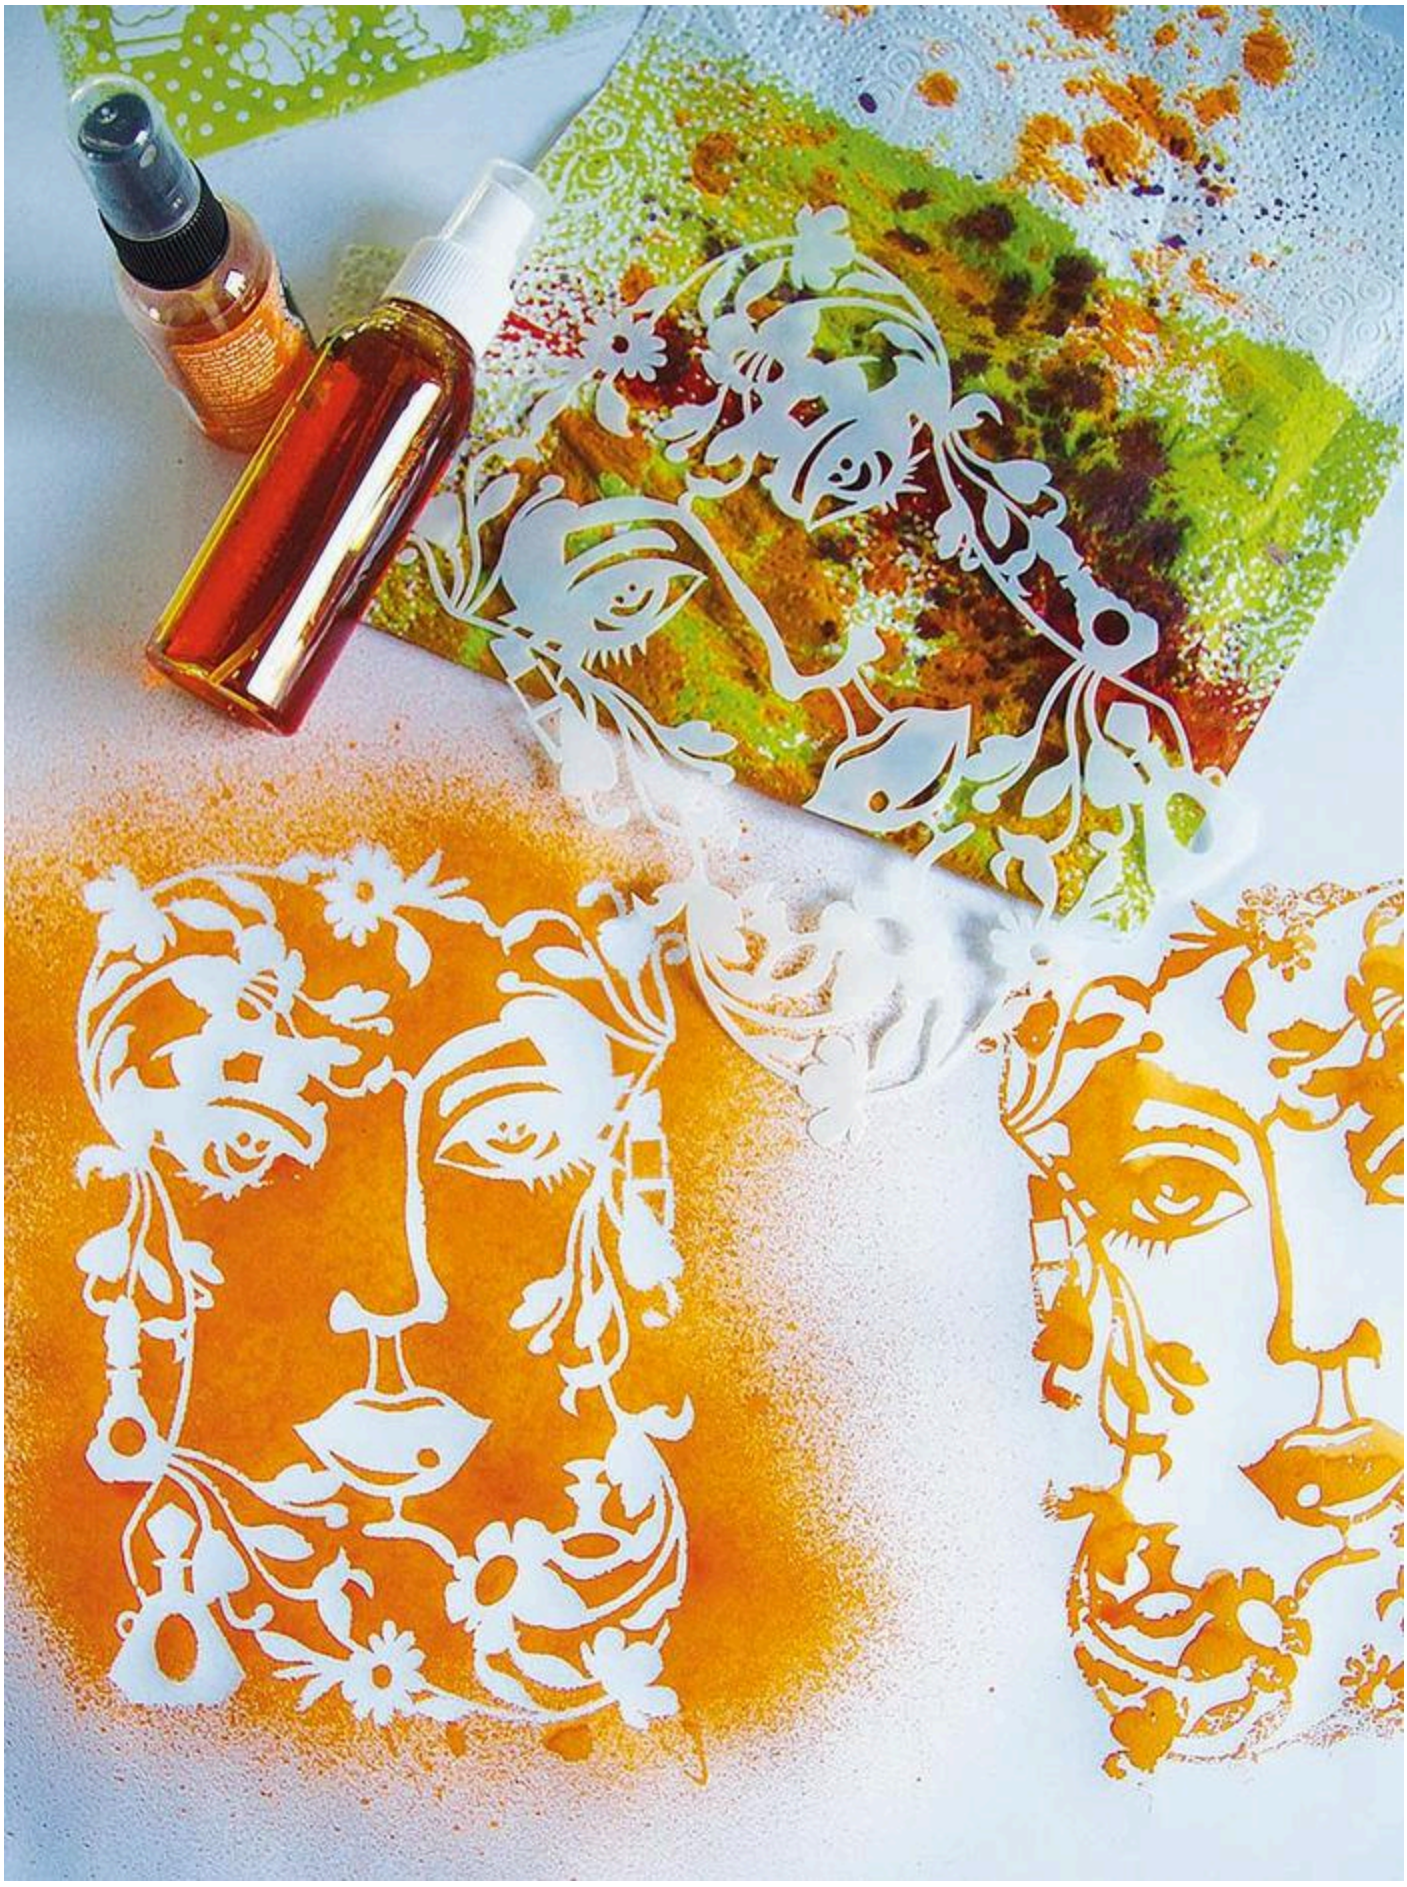

**9. Tip - Achieve interesting effects with the sponge**

An alternative method is to use sponges. Stippling brushes create very even motifs thanks to their fine-pored sponge.

**10. Tip - Think positive and negative**

Stencils can be used negatively (between the stencils) or positively (directly on the stencil). As a negative, simply place stencil on top and dab the spaces in between with paint. Or you can stamp with the stencils by applying the paint directly to the stencil and pressing it onto the surface. This technique opens up amazing design possibilities.

**11. Tip - Keep the stencil clean**

Don't forget to clean your stencil regularly to prevent unwanted paint residue when you reapply it.

## Tips for more creativity when painting stenciling

**12. Tip - Spray bottle technique**

Great effects can be achieved with a spray bottle and diluted stenciling ink A fashion spray and stencils can be used to creatively design textiles.

**13. Tip - letter stencils**

Letter stencils offer endless creative possibilities. Experiment with different fonts and create unique lettering.

**14. Tip - stenciling on glass**

Stencils on glass are particularly beautiful. With window paints, motifs can be used again and again, ideal for seasonal decoration.

**15. Tip - Add some sparkle to your stencilling idea**

With leaf metal creates shiny accents. Apply gold leaf priming milk like a stencil and apply the leaf metal with a brush. Messy edges can simply be plucked away here.

**16. Tip - Three-dimensional stencilling**

Use structure pasteto create three-dimensional effects. Instead of paint, use a spatula, to make your creations three-dimensional.

**17. Tip - Make your own stencils**

Create individual stencils from lamp foil. Cut out your own motifs with a cutter knife and enjoy the durability of the film.

**18. Tip - Still missing a brilliant idea for stenciling?**

Try this world map. The possibilities offered by this world map are impressive and provide many creative options.
